~ WHO LET THE COWS OUT? ~ IMPROVING EMPLOYEE RETENTION

Improving employee retention rates is a challenge for many organizations today. With an aging population and fewer young people joining the workforce the selection and retention of human talent is a strategic imperative. Our "Who Let the Cows Out?" program provides managers with key insights on how to recognize employees that are at risk of leaving. We illustrate the process nature of employee turnover and offer helpful tips on how to create a high retention culture. Presented as either a powerful keynote or in a seminar format this topic is a must for any organization looking to improve their retention rate with employees.
